Targeting of plasminogen activator inhibitor-1 activity promotes  
elimination of chronic myeloid leukemia stem cells

Takashi Yahata, Abd Aziz Ibrahim, Ken-ichi Hirano, Yukari Muguruma,  
Kazuhito Naka, Katsuto Hozumi, Douglas E. Vaughan, Toshio Miyata,  
and Kiyoshi Ando

Disclosures: The PAI-1 inhibitor used in this study is protected as intellectual property.  
T.Y., T.M, and K.A. are listed as inventors in the patent application. #8195;

Contributions: T.Y. and A.A.I. designed research, performed experiments, analyzed data,  
and co-wrote the paper; K.H., K.H performed experiments; K.N. provided study materials;  
M.Y. and D.E.V. wrote the paper; T.M. and K.A. conceived and designed the study.
