Version 3

Chemoimmunotherapy with rituximab, cyclophosphamide and prednisolone in IgM paraproteinaemic neuropathy: evidence of sustained improvement in electrophysiological, serological and functional outcomes.

Nancy T.H. Colchester, David Allen, Haider A. Katifi, Tracy Burt, Robert N. Lown, Ashwin A. Pinto, and Andrew S. Duncombe

Disclosures: None

Contributions: NC analysed the results, wrote sections of the manuscript and conducted neurological assessments. DA performed, analysed and wrote up all the neurophysiology. HK oversaw patient selection and reviewed from a neurology perspective. TB designed the database and collated the serological results. RL helped supervise treatment. AP contributed patients for assessment. AD wrote the treatment protocol and guideline, assessed patient suitability, supervised treatment and wrote sections of the manuscript. All authors contributed to reviewing and editing the manuscript.
