Impaired microRNA processing in neutrophils from rheumatoid arthritis patients confers their pathogenic profile. Modulation by biological therapies

Ivan Arias de la Rosa, Carlos Perez-Sanchez, Patricia Ruiz-Limon, Alejandra Patiño-Trives, Carmen Torres-Granados, Yolanda Jimenez-Gomez, Maria del Carmen Abalos-Aguilera, Irene Cecchi, Rafaela Ortega, Miguel Angel Caracuel, Jerusalem Calvo-Gutierrez, Alejandro Escudero-Contreras, Eduardo Collantes-Estevez, Chary Lopez-Pedrera, and Nuria Barbarroja

Disclosures: None

Contributions: I.A.-d.I.R., P.R.-L., I.C., M.C.A.-A., and C.P.-S. developed the in vivo assays, performed the in vitro experiments, solved technical problems and drafted the manuscript. R.O., M.A.-C., J.C.-G. and A.E.-C. followed up with patients, performed clinical analysis and contributed useful discussion; A.P-T performed experiments, C.T-G carried out flow cytometry, Y.J.-G performed statistical analysis and discussed results. E.C.-E., C.L.-P., and N.B. formed the hypothesis, directed and coordinated the project, designed the experiments, analyzed the data, and wrote the manuscript. All authors read and approved the manuscript.
