Src family kinase-mediated vesicle trafficking is critical for neutrophil basement membrane penetration

Ina Rohwedder, Angela R.M. Kurz, Monika Pruenster, Roland Immler, Robert Pick, Tanja Eggersmann, Sarah Klapproth, Jennifer L. Johnson, Sergi Masgrau Alsina, Clifford A. Lowell, Attila Mócsai, Sergio D. Catz, and Markus Sperandio

Disclosures: This work was supported by grants from the European Community's Seventh Framework Programme (FP7-2007-2013) under grant agreement HEALTH-F4-2011-282095 (TARKINAID to MS and AM), Deutsche Forschungsgemeinschaft (SFB 914, project B01 [MS], Z03 [MS]) and the Else Kroener-Fresenius-Stiftung (grant 2015\_A68 [IR]).

Contributions: IR designed and carried out research, analyzed data, and wrote the manuscript. AK, MP and RI performed experiments, analyzed data and corrected the manuscript. RP performed spinning-disk confocal microscopy experiments and analyzed data. TE, SK and SMA performed experiments. JLJ and SDC performed experiments and analyzed data. CAL and AM provided experimental tools and scientific advice. MS designed the overall study, analyzed the data, and wrote the manuscript.
