Version 3

Predisposed genomic instability in pre-treatment bone marrow evolves to therapy-related myeloid neoplasms in malignant lymphoma

Seiichiro Katagiri, Hideki Makishima, Kenko Azuma, Yasuhito Nannya, Yuu Saitoh, Seiichiro Yoshizawa, Daigo Akahane, Hiroaki Fujimoto, Yoshikazu Ito, Ravi Velaga, Tomohiro Umezu, Junko H. Ohyashiki, Seishi Ogawa, and Kazuma Ohyashiki

Disclosures: none

Contributions: SK, YS, SY, DA, HF, YI, and KO treated the patients; SK, KA, and HM performed targeted deep sequencing, and data analysis; YN performed validation sequencing; TU contributed essential reagents and tools; SK and HM wrote the manuscript; RV performed critical and English review; SK designed the research; and JHO, SO, and KO supervised the project. All authors contributed to data analysis and drafting of the manuscript.
