

Haematologica
HAEMATOL/2019/232850
Version 3

Severe bleeding and absent ADP-induced platelet aggregation
associated with inherited combined CalDAG-GEFI and P2Y12
deficiencies

Barbara Lunghi, Anna Lecchi, Rosa Santacroce, Mariangela Scavone,
Rita Paniccia, Andrea Artoni, Christian Gachet, Giancarlo Castaman,
Maurizio Margaglione, Francesco Bernardi, and Marco Cattaneo

Disclosures: None of the authors has conflicts of interest to disclose

Contributions: B. Lunghi and R. Santacroce performed the genetic studies, interpreted the data and revised the manuscript; A. Lecchi, M. Scavone and R. Paniccia performed the platelet function studies, interpreted the data and revised the manuscript; A. Artoni and G. Castaman evaluated the clinical phenotypes of the patients, interpreted the data and revised the manuscript; C. Gachet contributed to the performance of binding studies, interpreted the data and revised the manuscript; M. Margaglione coordinated and planned the WES investigation, interpreted the data and revised the manuscript; F. Bernardi planned the molecular genetic studies, interpreted data and contributed to write the manuscript; M. Cattaneo coordinated the study, interpreted the data and wrote the manuscript.
